EDUCATION

University of Toronto

2025

Honours Bachelor of Science: Computer Science & Statistics

- **Relevant Courses:** Software Design, Theory of Computation, Data Structures and Analysis, Artificial Intelligence, Machine Learning, Databases, Probability and Statistics II, Methods of Data Analysis, Human-Computer Interaction and Communication, Fundamentals of User Interface, UX Design - Prototyping and Evaluation

PROFESSIONAL EXPERIENCE

Application Programmer Co-op

May 2023 - August 2024

Ministry of Education

Toronto, ON

- Developed and tested web applications in an Agile team environment using **VBScript and HTML**, debugging and troubleshooting to improve system reliability and reduce post-deployment issues by **20%**.
- Automated accessibility compliance testing by integrating tools like WAVE, JAWS, and NVDA and ensuring **WCAG 2.0** adherence and enhancing usability for **1,000+ end users**.
- Authored **10+ detailed technical documents** covering workflows, testing protocols, and deployment steps to reduce onboarding and new-hire ramp-up time by **30%** and improve knowledge transfer across dev teams.
- Logged and tracked **40+ defects** using **ALM and JIRA**, collaborating with developers to resolve **95%** pre-release and reducing average defect resolution time significantly.

PROJECTS

Personal Portfolio Website with AI Chatbot | *React, Tailwind CSS, React Router, GitHub Pages, Vercel, OpenAI API*

- Designed and developed an interactive, responsive pixel-art “virtual desk” UI portfolio website, with clickable interactive objects (GitHub, LinkedIn, Resume, About, Contact), attracting 150+ visitors in the first month
- Integrated an AI chatbot using OpenAI API with a Node.js serverless backend on Vercel, enabling 24/7 automated Q&A, cutting recruiter inquiry response time and increasing engagement by 40% compared to static sites

k-Nearest Neighbors MNIST Classifier | *Python, NumPy, Matplotlib, Pillow*

- Implemented a k-NN classifier on a subset of 5,000 MNIST digit images, handling data loading, vectorization, distance computation, and normalization; achieved **90% test accuracy** on the best model (k=5, normalized)
- Visualized accuracy trends with Matplotlib across varying *k* values and normalization techniques, identifying optimal hyperparameters and improving model performance by 63% over the unnormalized baseline

Three Musketeers | *Java, JavaFX, JUnit testing*

- Collaborated with a group of 3 students to develop a GUI board game using the MVC software design pattern and core OOP principles: abstraction, encapsulation, inheritance, and polymorphism

Heart Disease Prediction using Decision Trees (NHANES Dataset) | *Python, scikit-learn, Pandas, Matplotlib*

- Built and tuned Decision Tree models on a NHANES dataset of 8,000 patient records, balancing bias-variance trade-offs and achieving **96.8%+ test accuracy** in predicting heart disease risk with optimal hyperparameters
- Conducted extensive Exploratory Data Analysis (EDA) and feature engineering (handling missing data, encoding categorical variables, scaling), improving interpretability and boosting validation accuracy by 25%
- Visualized feature importances and decision boundaries with Matplotlib to identify key health predictors, enabling more explainable ML insights for non-technical stakeholders

LEADERSHIP EXPERIENCE

Director

July 2022 – April 2023

Women in Science and Computing (WiSC)

- Drove a **30% increase in social media engagement** by launching a strategic content calendar across Instagram, LinkedIn, and Discord, expanding WiSC’s visibility to 500+ students.
- Collaborated with marketing and graphic design teams to deliver consistent branding and executed community engagement strategies that boosted event attendance and member retention.

TECHNICAL SKILLS

Languages: Python, Java, HTML, CSS, JavaScript, C, SQL, PostgreSQL, R, Bash, Shell, VBScript, Assembly

Frameworks: React, Tailwind CSS, NumPy, Pandas, Matplotlib, Scikit-learn, Pytest, JUnit, JavaFX, RESTful APIs

Dev Tools: Git, GitHub, VS Code, PyCharm, Eclipse, Jira, ALM, Linux, Figma, Adobe XD
